

[Who we are]

- 10 year track record
- Certified **W/MBE**
- Uses of CMM / ITIL

We are Novasys, a full-service software development and consulting services provider to a wide range of customers. Our clients include Fortune 1000® corporations, hotshot startups, software development / consulting companies and hardware manufacturers. Since our inception in 1998, we have diligently worked on mutually fruitful relationships with all our clients. We are firmly rooted in the belief that total customer satisfaction is the key to success.

We work on solutions - technology is just a tool. Over the years we have amassed over two hundred man-years of experience in executing a large variety of projects for prestigious clients such as BNY Mellon, DC37, Citigroup, CSP Technologies just to name a few.

[What we do]

- **O³** Advisory Services
- S/W Development
- IT staffing

We offer many combinations of development alternatives including fixed price based, giving our customers the flexibility to balance their budgets and schedules. We use resources having experience in ITIL, CMM, ISO, and PMI and other technology based certification.

We discover, design, and deliver cutting edge IT solutions to our customers. Although we specialize in the areas of mobile computing, web-enabled and client/server system, our approach remains holistic.

Our services range from Requirements Gathering, to Development, Maintenance, and optimization solutions for Onsite/Offshore Outsourcing (**O³**). Our engineers utilize the latest in web, Open Source, database, and OS technologies to deliver supportable and scalable solutions. Our expertise includes Open Source, Java, J2EE, .Net, C#, C/C++, Unix/Linux, W/7, SQL server, Oracle, DB2 and others including **BI** and **SAP**.

[Who does *IT*]

- Top talent
- Onsite / Offsite
- Near/Far shore

Novasys is founded and lead by a team of industry professionals with substantial experience in leading and managing large and complex projects using many different technologies. Our team members continuously go through formal and informal training to keep them abreast of the latest developments in technology and methodology. All our software professionals have educational qualifications of graduate level or above in computer science or engineering, many of whom are industry certified professionals.

[How we help]

- Fixed fee option
- Progress & Acceptance linked payments
- Save up to 50%

We have the experience, technology, and people to work on very large projects for Fortune 1000® clients. However, we are small enough to give total attention to and work very closely with medium sized and small companies.

Our flexible offerings will help you choose the part of our expertise that you need most. We can design and deliver an entire IS solution or help on a module that requires specific skills. We can provide skilled manpower resources on a long term basis or we can fill a short-term vacancy. We can work with you at your site or carry out the work at our development facility.

The **bottom line** is that we will do what it takes, so that you can find world class IT solutions to your business issues and opportunities.
